RE: Destiny UI Engineer – Commercialization

To Whom It May Concern,

I am writing to express my interest in the listed position for a new Destiny UI Engineer. As a recent graduate of Binghamton University, I possess a Bachelor of Science in Computer Science. I am looking to apply my skills and abilities to an innovative, team-oriented position with a leading company such as Bungie.

With my previous experience as a Course Assistant, I was able to hone my ability to communicate with both students and my fellow peers on a multitude of technical levels. In addition, many of the projects I have undertaken as part of my coursework involved working with others as a team and writing in the C++ language from an object-oriented approach. I am eager for the opportunity to learn from and contribute to the engineering team by applying my collaboration, communication, and teamwork skills.

As a long-time Destiny player, having started back in 2015 with The Taken King expansion, I have long been in awe of the art and design of Destiny. From the environment to the music, Destiny has always been a leader in all aspects of design in the gaming industry, including UI. My focus, as an aspiring professional, is to utilize my skills and experiences in programming and make a positive contribution to the engineering team. I am excited to showcase my skills and love for Destiny in building an innovative new world with Bungie.

Please review my enclosed resume for additional details. I would love the opportunity to share more with you about my qualifications and am looking forward to hearing from you. Please keep me in mind for any other roles you may think I will be a good fit for. Thank you for your time and consideration.

Sincerely,  
Brian Ni.
